Professional Summary

Dynamic and accomplished Senior Data Analyst and certified AWS solution architect associate with a solid 6.6-year tenure in leveraging data-driven insights to fuel business growth and optimize operational efficiency. Known for a meticulous analytical mindset and an advanced command of data analysis tools and techniques. Adept at translating complex data findings into actionable recommendations, catering to both technical and non-technical stakeholders. Committed to staying abreast of emerging trends in data analytics, demonstrating an unwavering dedication to continuous learning.

Skills

- **Programming Language:** Python (Pandas, NumPy, Sklearn), OpenAI, LLM
- **Databases:** SQL
- **Data Visualization and Reporting:** Tableau, PowerBi, Advanced Microsoft Excel, PowerPoint, Plotly, Matplotlib, Seaborn
- **Data Wrangling & Cleaning:** Working with outliers, missing data, reshaping, data, aggregation, filtering, selecting, calculating, etc.
- **Data Preprocessing & Feature Engineering:** Preparing data for machine learning, Engineering Features (text, aggregates)
- **Machine Learning:** Knowledge of Linear regression, Logistic regression, Lasso L1 Regularized, Ridge L2 Regularized, Decision tree, SVM, Naive Bayes, KNN, K-means, Random Forest, PCA (Dimensionality reduction), Kfold, Gradient boosting, Save and load model using pickle.
- **Cloud & Deployment:** AWS, GitHub
- **Management Tools:** JIRA, Confluence, TFS
- **Languages:** English (Fluent), Japanese (Conversational)

Senior Data Analyst | TechnoPro Inc. | Tokyo, Japan | [03/2023] – Till Date

1. Designed and developed a comprehensive Capability Map project web application utilizing **AWS** architecture, ensuring high scalability and performance.
2. Developed and integrated Power BI for building interactive dashboards, enabling stakeholders to visualize and analyze complex data sets with ease. Executed efficient and streamlined data extraction, transformation, and loading (**ETL**) processes from diverse data sources into **Power BI**, ensuring seamless data integration and enabling real-time insights.
3. Developed robust and scalable data models, incorporating advanced techniques and best practices, to support complex business analyses and implemented intricate **DAX** (Data Analysis Expressions) calculations for accurate data analysis and reporting.
4. Conducted extensive data analysis, utilizing statistical techniques and visualization tools to identify patterns, trends, and actionable insights.
5. Collaborated with cross-functional teams to gather requirements, design solutions, and ensure timely delivery of projects.
6. Leveraged cloud-based technologies, including AWS services such as EC2, S3, and RDS, to optimize application performance and reliability.
7. Implemented best practices for software development lifecycle, including version control and testing.

Senior Data Analyst | TCS | Tokyo, Japan | [12/2016]– [03/2023]

1. **Classification:** Analyzing email data to classify messages as relevant or not. Developed and implemented a machine learning-based email classification system with high accuracy, improving efficiency by reducing time spent on sorting irrelevant emails.
2. Web Application for OEM (**Harness Optimization Tool**) Developed a web application for optimizing harness variation parts, resulting in a 75% cost reduction for the OEM. Implemented a combinatorial algorithm to quickly calculate optimal combinations from millions of possibilities.
3. Web Application for OEM (**Test Vehicles Scheduler Optimization**) Built a web application to generate schedules for test vehicles, considering various constraints. Utilized Python and SQL for data analysis, pattern identification, and optimization techniques.

Contributions:

1. **Data analysis:** I have analyzed large datasets to identify trends, patterns, and opportunities for business improvement. I have used tools such as Python (NumPy, Pandas, Scikit Learn, Seaborn), Excel, SQL, and data visualization tools Tableau, and Python libraries (Plotly, Matplotlib) to analyze and present data effectively.
2. **Project management:** I have led cross-functional teams to deliver projects on time and within budget. I have used my strong organizational skills to break down complex projects into smaller, manageable tasks and delegate them to team members. Led the Digital Transformation projects of a Japanese OEM company with **20 full-time engineers** and improved old tool **efficiency by 95%, cost reduction by 75%**, and overall process efficiency by 30%. Dedicated to maximizing the impact of key performance metrics to enhance and expand business operations.
3. **Insights and recommendations:** I have provided insights and recommendations to stakeholders based on my analysis of business processes and data. I have presented my findings in a clear and concise manner to help drive decision-making.
4. **Process improvement:** I have identified opportunities for process improvement and worked with teams to implement changes that increase efficiency and reduce costs.
5. **Stakeholder management:** I have developed strong relationships with stakeholders, including customers, partners, and team members. I have effectively managed their expectations and ensured their needs are met.

Education

B.E. Computer Science Shri Sant Gajanan Maharaj College of Engineering (05/2016)

Certifications

1. **AWS solution architect associate (SAA-C02)**
2. Professional Scrum Master (PSM-1)
3. JLPT N5 Certified (Pursuing N3)
4. Learning Deep Learning, and NLP, OpenAI, LLM
